1 EXECUTIVE SUMMARY

The following sections describe the Ingenico North America (NAR) software releases for Telium Tools. This document includes accumulative version information beginning with release version 2.4.0

Section 2 contains information for each release. A release will be encapsulated in a version description section for the respective release version. Therefore, one section, a “Version Description” section, is dedicated to each release.

A Version Description section identifies the following:

- Changes since the previous release.
 - Changes are categorized as New Functionality and Product Improvement and Fixing of Problems Reported.
- Package(s) included in the release.
 - Telium Tools Installer contains the following features:
 - Form Builder
 - Data Packaging Tool
 - Script builder

2 VERSION DESCRIPTION SECTIONS

The following chapters describe a single release version per section.

2.1 Telium Tools Release 2.7.0

Table 2-1 Telium Tools New Functionality and Improvements

| Issue Number | Description |
|----------------------------|--|
| TELTOOLS-7 | Added new control to Form Builder 'Ads Video'. When this control is on the form with the correct AUID property it will start a download of the video from the OpenX server. |
| TELTOOLS-8 | Add ability in DPT to create IFB files. New check box added to TGZ and OGZ tabs. If the check box to create IFB files is checked. DPT will create an IFB file when creating OGZ or TGZ. The output file will be at the same location. |
