

Programming instructions for 2D scanner (Motorola D6708)

To begin programming a parsing rule:

1. Scan **Begin New Driver's License Parse Rule** below.
2. Scan field bar codes on the following pages in the exact order to complete the parsing rule.
3. After entering the entire rule, scan **Save Driver's License Parse Rule** to save the rule.

To abort the programming sequence at any time during programming, scan **Quit Entering Driver's License Rule** below. Any previously saved rule is retained.

To erase a programmed saved rule, scan **Erase Driver's License Parse Rules**.

Embedded Driver's License Parsing

Begin New Driver's License Parse Rule
