

## AXIS Essentials Hardware Requirements and Compatible Peripherals

### AXIS Workstation

Workstation to access Datacenter and/or Register Applications

- Windows 10 Pro 64 Bit
- 4 GB Ram (8GB Recommended)
- i3 (2.4 GHz or better) or equivalent processor
- 100GB Hard Drive
- 1920 x 1080 Display Resolution
- Microsoft Office

### AXIS Essentials Server (Maximum Two Workstations)

A machine that houses the AXIS database

- Windows 10 Pro 64 Bit
- 8 GB Ram
- i5 (2.8 GHz or better) or equivalent processor
- 250GB Hard Drive
- 1920 x 1080 Display Resolution
- Microsoft Office
- SQL Server Express

AXIS server requires 24/7 hardwired Internet connectivity.

### Network Infrastructure\*

- 1 Gbps (1000Mbps) Internal Network Speed
- Switch Ports
- Routers
- Firewalls
- Network Interface Card (NIC)
- Category 5e (Cat5e) or Better Network Cabling
- 802.11ac Wireless for the Handheld Device

\* AXIS Retail Software performance will be greatly hindered if sharing a network with VOIP and/or surveillance systems, therefore AXIS must run on a segregated network. Wireless devices using 802.11a, 802.11b, 802.11g and 802.11n cannot support 1000Mbps speeds and are not compatible. Workstations and Registers require a wired connection. Verifone MX credit card machines require an independent wired connection to the local area network (LAN).

### Approved Hardware and Software Integration

System compatible hardware devices and 3rd party software solutions available for integration

#### PERIPHERALS:

- Zebra GK420D Label Printer
- Star TSP 100 Series Rcpt. Printer
- APG or M-S Cash Drawer

#### ACCOUNTING SOFTWARE

- QuickBooks Desktop 2014-19  
(No Online)

#### CREDIT CARD MACHINES:

- Verifone MX 915/925

#### HANDHELD DEVICE:

- Datalogic Skorpio X4  
(Windows Mobile OS)

#### SCANNERS:

- Symbol DS4308-DL
- Datalogic QuickScan Lite
- Datalogic Gryphon GM4130

#### SIGNATURE DEVICE

- Topaz T-S460
