2 PURPOSE AND SCOPE

2.1 Purpose

This update is in response to changes created with the recent V6 System Release on Oct 5th and will be available on the afternoon of Tuesday 11/19/2013 . Please be sure to **update to the newest version** to make the following updates and bug fixes apply to your V6 Inventory Management System. This Update Notes Summary document provides a high-level summary and description about the changes that have been prioritized for this release.

V6 Release Notes

3 V6 UPDATE SUMMARY

3.1 V6 Update Summary

As a part of this release, the following updates and defect resolutions were made to the system.

- **Security Enhancement**
Security setting must be enabled to access AR Posting menu.
- **Field Expansion**
Purchase Order Number field has been increased to 20 characters.
- **Committed Quantities Fix**
Kit items and Work Orders properly designate quantities to committed when updated at the POS. Accurate quantities displayed upon running **Cleanup** within the **Resets** menu.
- **Removed Unnecessary IMS Options**
Mask Merchant Copy Credit Card # check box in IMS Properties>POS and **Open DataSource** in the File dropdown are no longer necessary and have been removed.
- **Transaction Receipt Addition**
POS receipts, as well as IMS invoices, will display the Merchant ID# on credit card transactions.
- **Layaway Void Fix**
Void layaway/tax conflict resolved.
