AXIS™ 2.18 Release Notes

March 2019

Notices

General

No part of this document may be reproduced, distributed, performed, displayed, or used to prepare a derivative work without the prior and express written consent of Retail Technology Group Holdings ("RTG"). The software described in this document is furnished under a license agreement and may be used only in accordance with the terms and conditions of the license agreement. Information in this document is subject to change without notice, and RTG assumes no responsibility for errors.

Trademarks and Credits

RTG, AXIS, AXIS Retail Management System (AXIS RMS), AXIS Data Center, AXIS Register, and AXIS E4473 are trademarks of RTG and shall not be used without the express written permission of RTG.

Other trademarks, such as QuickBooks, are not being used as a trademark herein and are the property of the respective owners.

Legal Counsel

This program, printed documentation, and documents should not be used as a substitute for professional advice in specific situations. The procedures, images, and examples in this document are for illustrative purposes only and may not be applicable in your setting due to differences in preference, settings, and/or state and local regulations.

The following notice is required by law:

RTG products and services are not a substitute for the advice of an Attorney. You are encouraged to seek the advice of your own attorney concerning the use and legality of this program, documentation, and forms.

Contents

Overview

The RTG® Retail Technology Group (RTG) provides this document as a high-level summary of the latest release of the RTG AXIS software system.

Enhancements & Bug Fixes

The following sections have been updated to provide better performance and functionality.

- **Auto Order**

    o Purchase order numbers will now sync with distributor packing slips to help improve the receiving process.

- **Register Application**

    o The Item and Firearm lookup screens have been updated to populate information only after a search has been conducted to improve performance.

    o The grid view for the Item and Firearm lookup screens have been updated to include additional search and column filtering functionality, similar to what you would see in the Datacenter application.

- **Physical Firearm Inventory Count**

    o Pre-defined status filter options are now available at the top of all Physical Firearm Inventory Count screens. Selecting one or more of the 3 options will filter the "Status" column in the grid view based on the option(s) you choose.

- **Store Information Setup**

    o An option has been added for "Allow Class Overbooking". When enabled, you will be able to add more participants to an education class when the max participants number has been reached.

- **Miscellaneous Bug Fixes and System Improvements**
