

Retail Technology Group is excited to announce the AXIS Release 2.15!

Release 2.15 of the Retail Technology Group's AXIS software will be made available in the coming week. This update will be primarily address performance quality. Several new features will be introduced in this release, with a focus on billing and invoicing improvements. Please take a moment to review the most notable enhancements included in Release 2.15.

Feature Enhancements

Feature improvements to enhance usability and expand functionality of the AXIS system

- **Shelf Label** – A horizontal shelf label (2.5" x 1.25") has been added to the list of available price label options
- **Membership Duration Adjustments** – The membership expiration date of specific enrollees may be modified
- **Sales Order Transfer to Register** – A Sales Order generated in the Data Center may now be made available for retrieval and payment at the Register
- **House Account Invoice-style Receipt** – A Register transaction charged to a House Account may have a receipt printed as a customizable 8.5" x 11" invoice

To benefit from the enhancements included in AXIS Release 2.15, apply the update to the AXIS RMS at your earliest convenience. Please refer to these easy to follow [instructions on software installation](#) or our [AXIS 2.15 release video](#). To reduce any installation complications we recommend restarting your AXIS server before updating the AXIS Retail Management System.

Should you have any questions regarding these changes, or if you need any assistance, please contact the RTG support line at **800.547.7120** or RTGSupport@AcuSport.com.

Thank you for your business!
